Your plus for more flexibility.

DECENTRALIZED INSTALLATION INNOVATIVE SOLUTIONS WITH CUBE67+

A PLUS FOR INCREASED FLEXIBILITY

Cube67 stands for efficient and economic solutions. The innovative fieldbus system from Murrelektronik has radically simplified and modernized decentralized installation. Now we present Cube67+ with a plus for increased flexibility.

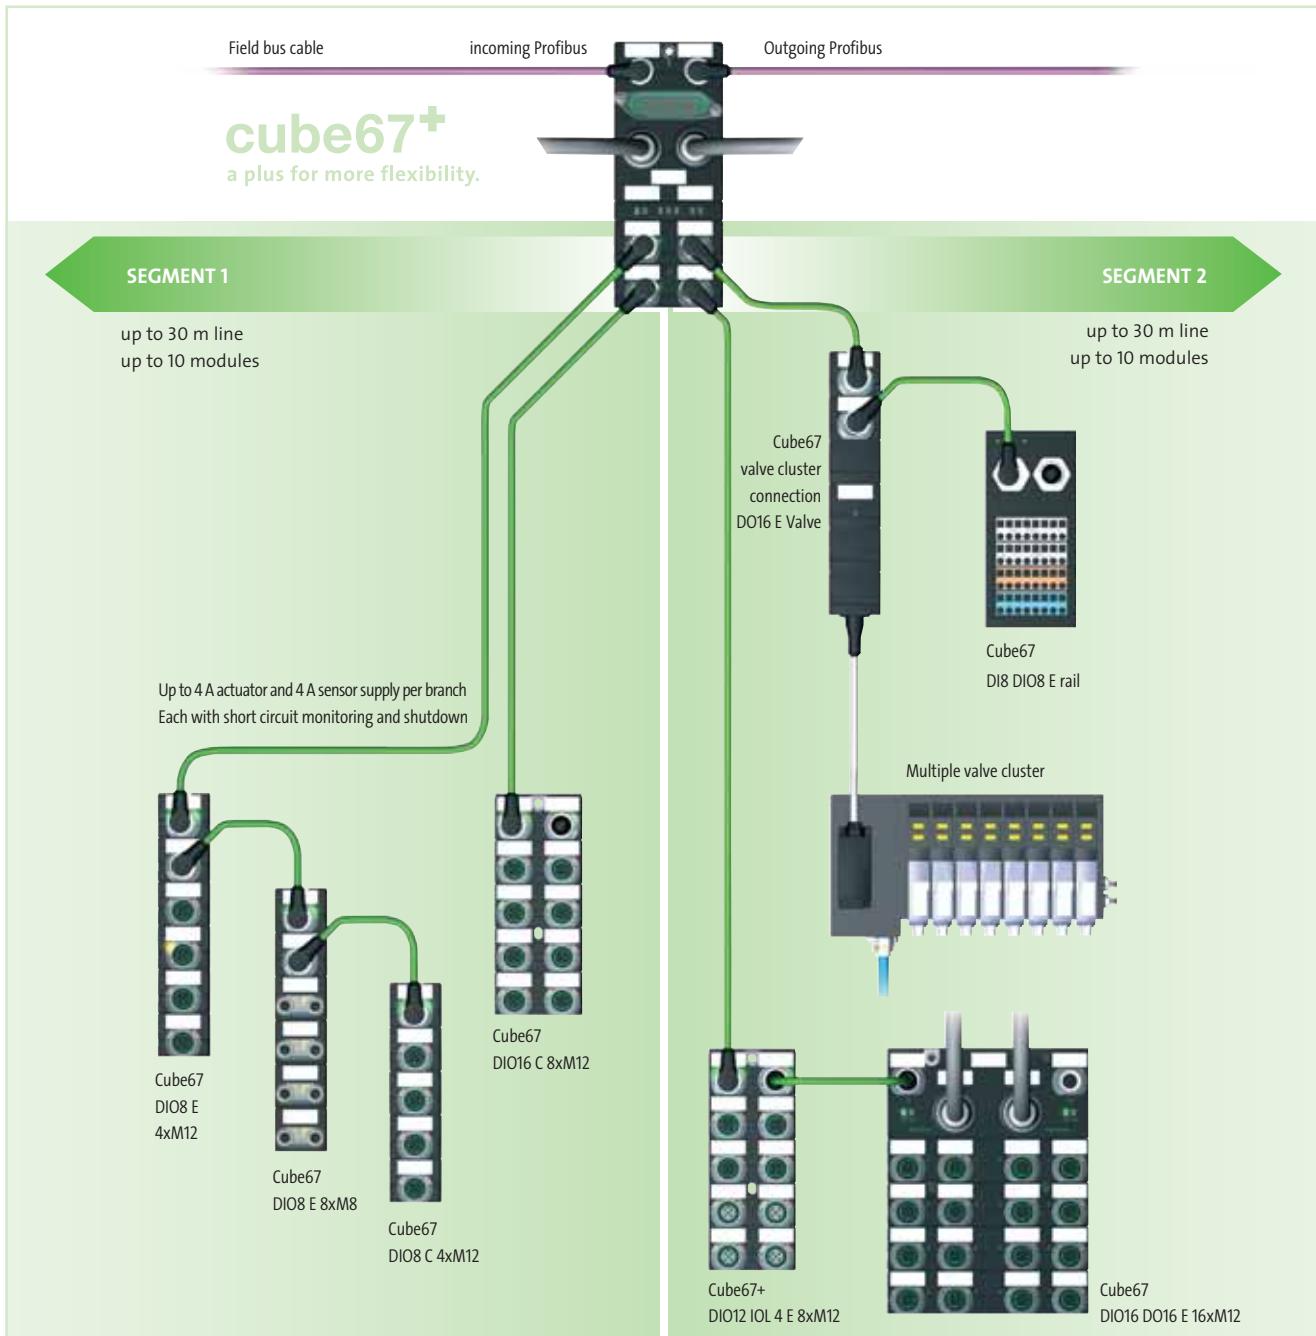

Cube67+ is a new, innovative bus node. With this module Murrelektronik expands its tried and tested Cube67 system. It allows fieldbus installations to be even more application-oriented.

Cube67+: the plus stands for...

- + an increased number of modules, up to 2 x 10 modules
- + increased cable lengths for installations up to 2 x 30 meters
- + modules that can be installed at any position on the hybrid cable
- + daisy chaining of the power supply at the bus node

Cube67+: the plus stands for increased flexibility in decentralized installation technology with even more modules, longer cables, and higher performance.

Cube67+

SYSTEM DESCRIPTION CUBE67+

■ Number of modules per bus node	20
■ Number of modules per segment	10
■ Addressing	automatic
■ Connection	hybrid line
■ Max. system connection per segment	30 m
■ Topology	Star/Line
■ Data security	Hamming distance 6
■ Transmission type	Change of State

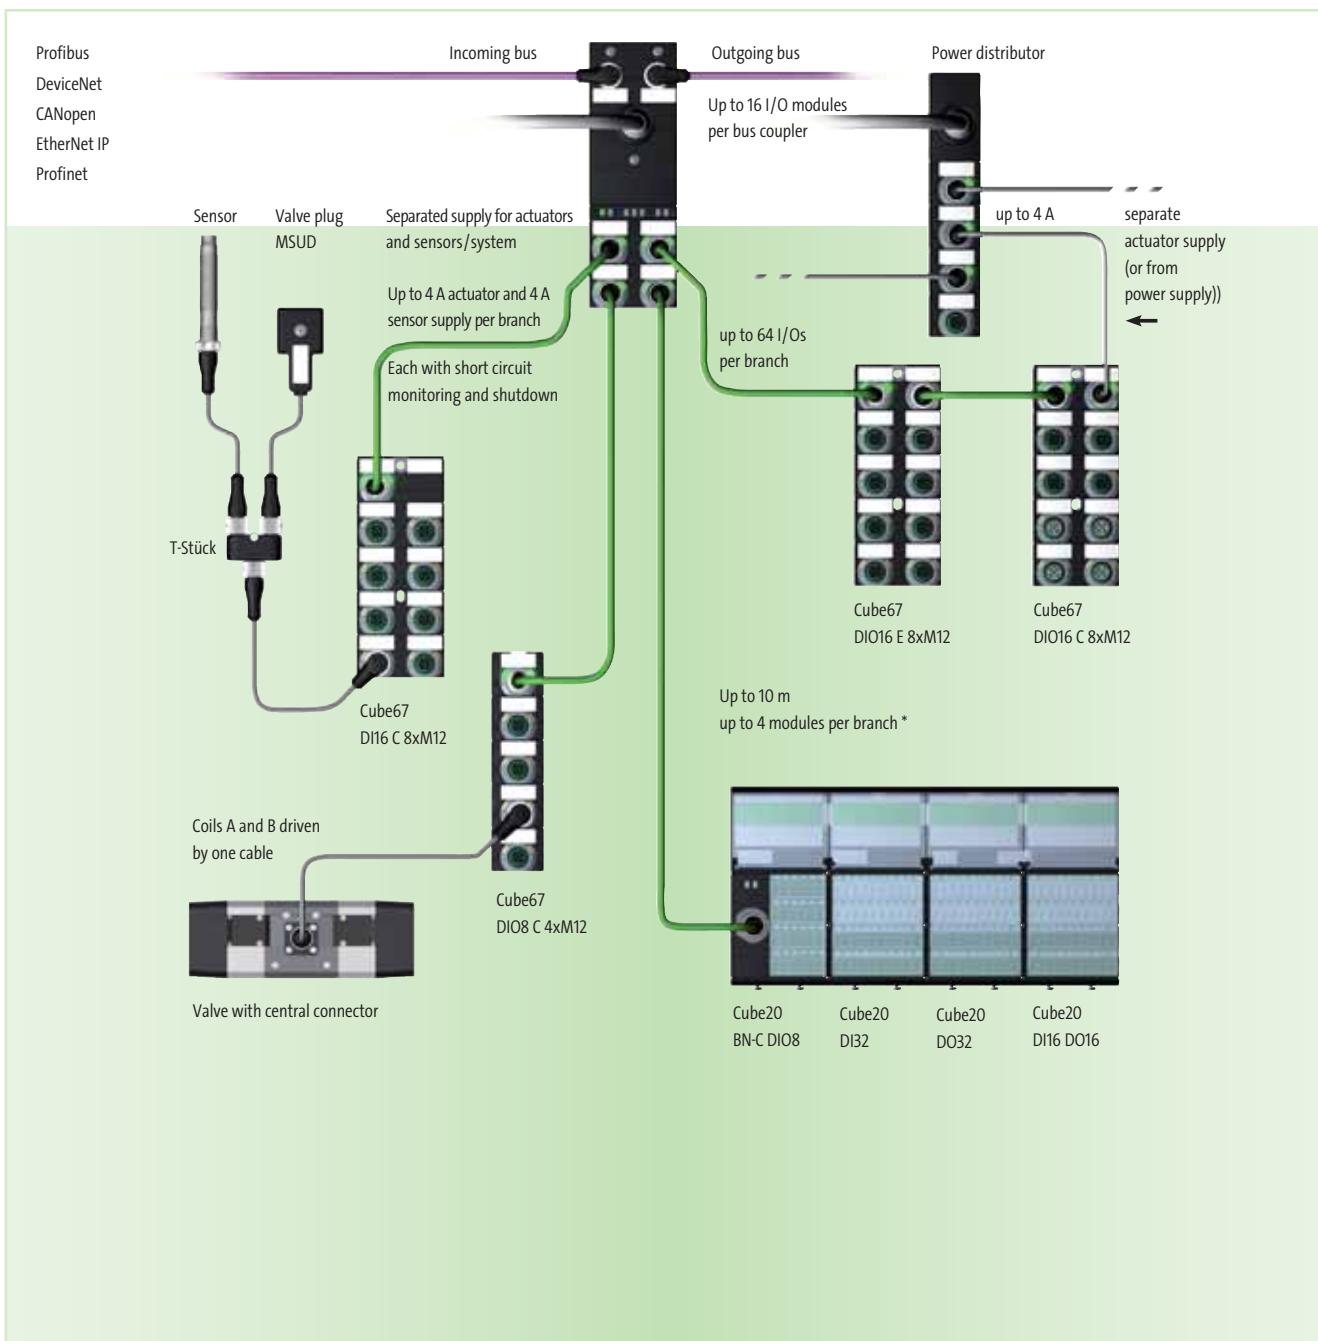

SINGLE-CHANNEL DIAGNOSTIC

Display per PIN	- Sensor short-circuit - Actuator short-circuit - Under voltage - Wrong connection - DESINA diagnostic
-----------------	--

DISPLAY

■ Module OK	green
■ Initialization/ no data exchange	green blinking
■ Diagnostic	red
■ Signal status	yellow

CUBE67

SYSTEM DESCRIPTION CUBE67

■ Number of modules per bus node	16
■ Number of modules per branch	4
■ Addressing	automatic
■ Connection	hybrid line
■ Max. distance between bus coupler and end of branch	10 m
■ Topology	Star/Line
■ Data security	Hamming distance 6
■ Transmission type	Change of State

* Pay attention to projecting hints

SINGLE-CHANNEL DIAGNOSTIC

Display per PIN	- Sensor short-circuit - Actuator short-circuit - Under voltage - Wrong connection - DESINA diagnostic
-----------------	--

DISPLAY

■ Module OK	green
■ Initialization/ no data exchange	green blinking
■ Diagnostic	red
■ Signal status	yellow

ECONOMICAL DISTRIBUTION MODULAR, COMPACT AND ROBUST

- The I/O layer is where you need it – right in the machine and close to the sensors and actuators, instead of occupying one large area or being concentrated in the control cabinet
- The minimal dimensions allow compact construction of the machine
- LEDs close to each sensor/actuator
- Easily expandable
- Shortest sensor and actuator cabling
- Reduces wiring costs, eliminates junction boxes
- Saves space in the machine or the control cabinet
- Can be combined with Murrelektronik Cube20

BECOME INDEPENDENT OF THE PLC PROTOCOL CHANGE THE BUS INSTEAD OF THE SYSTEM – YOU CHANGE ONLY THE BUS COUPLER

This makes the machine installation independent of the controls and the fieldbus, which means that the application can be adapted to the end user's PLC specifications without you having to modify the I/O periphery.

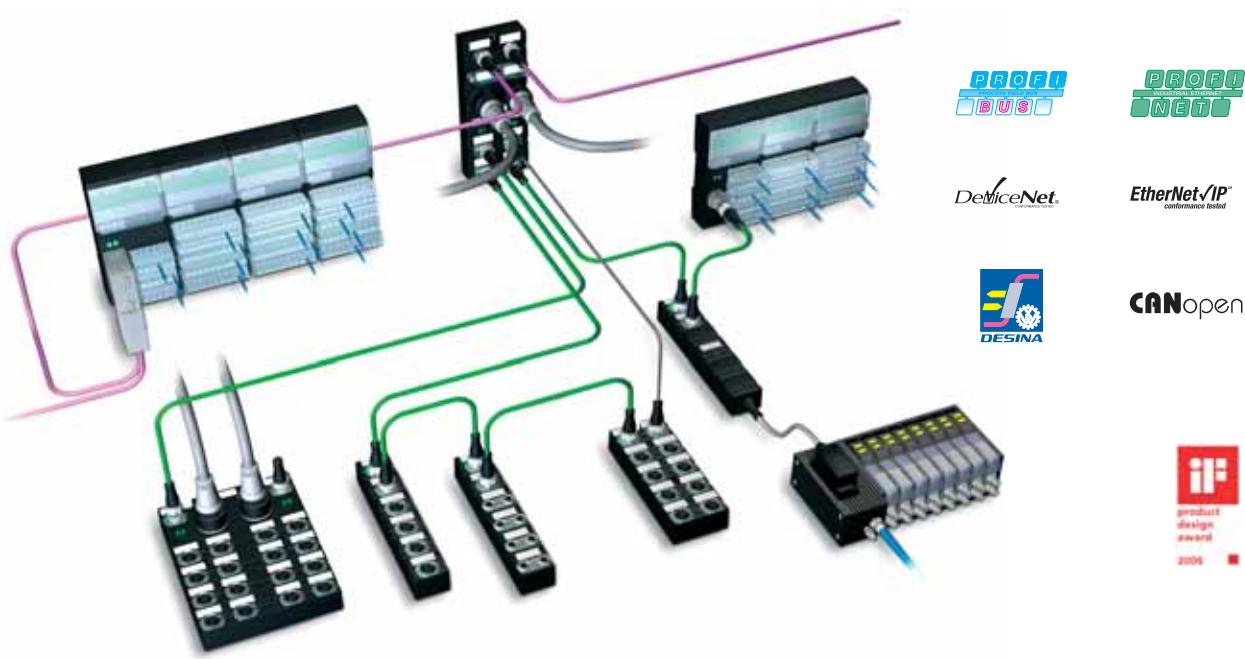

- Standardization of the installation
- Possibility of flexible response to all specifications from end users
- Configure the machine only once
- Create the documentation only once
- System skills needed only once
- Minimizes inventory

BUS NODES

MULTIFUNCTIONAL I/O MODULES

“DON’T LOOK FOR ERRORS – FIND THEM“ – TOTAL DIAGNOSTIC

That means detailed information on type and location of the fault or error.

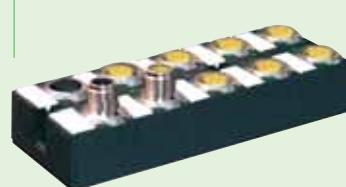

- Single-channel diagnostic and shut down
- Detailed message to controls
- Monitoring and shut down of the Cube67 system connection

Errors are found more quickly, while the system can even continue to operate. Downtimes are reduced, start-ups accelerated, remote maintenance is possible. And in case of error the complete module is not shut down, but only the plug position concerned.

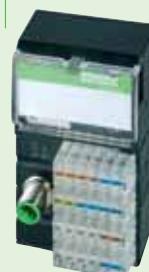

VALVE CLUSTER INTERFACES

SAFETY OUTPUTS

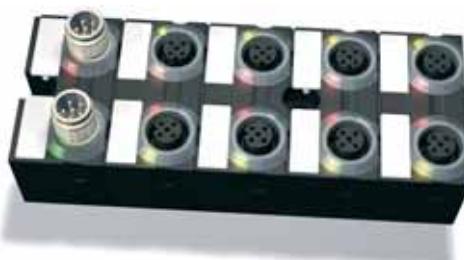

TERMINAL BLOCK MODULES

CUBE67

FEATURES AND BENEFITS

Highest flexibility through multifunctional I/Os

Both signals on each port can be configured independently, whether input, diagnostic input or output.

- Avoiding unused reserves
- Connecting double valves via one plug

“Don’t look for errors, find them” – Total diagnostic

Detailed information on type and location of the fault or error.

- Only the “affected” plug position shuts down
- Minimizes system downtime
- Makes remote maintenance possible

“Assemble and plug in – that’s all”

Elaborate wiring replaced by quick, simple plugging.

- Avoids wiring errors
- Shortens commissioning time
- Quick swapping of cables

SIMPLIFIED INSTALLATION

Cube67 is the new benchmark in automation technology. Small, multi-functional I/O modules and the variety of different interfaces are the key to simplified installation. Assembly can take place in close proximity to sensors and actuators. This saves time during installation and offers advantages in service due to easy trouble-shooting.

CUBE20

INNOVATIVE INSTALLATION TECHNOLOGY

Cube20 is a fieldbus I/O station with modular expandability, which can be integrated along with the Cube67 I/O system. Cube20 is designed to meet the requirements of modern control cabinet wiring. High costs caused by handling many individual components can be reduced by implementing Cube20, thanks to the compact design with a high channel density of 32 channels per I/O module. With 488 channels on 90 cm, Cube20 can help to save space and provide more flexibility. In addition, Cube20 comes with maintenance free plug terminals for single wire installations which are typical for control cabinets.

Practical Applications

Cube20 I/O modules are galvanically separated and have an integrated power-supply terminal. This simplifies the implementation of different potential groups. Of course, Cube20 provides the convenient diagnostics already known from Cube67. This facilitates troubleshooting and thus minimizes downtimes.

Convenient Channel Diagnostics

- Signal status and error display directly at the connecting terminal
- Rapid failure localization
- Channel-related status display
- Reduced downtimes
- Increased productivity

NEW CONCEPTS FOR RATIONAL INSTALLATIONS

- Easier handling with a reduced number of individual components
- Save space with to high channel density and compact design
- I/O connections with maintenance-free connecting terminals
- Integrated power-supply terminals for practical applications

I/O connector	spring clamp plug-in terminals, max. 2,5 mm ²	
Dimensions	H x W x D	117 x 56 x 47 mm

CUBE67/CUBE20 – MODULARE I/O-STATION IP67/IP20

Input module
Input/output module
Output module
 – analog I/Os

Cube20 AI4 U/I

Input module

Cube20 AO4 U/I

Output module

Ordering data	Art.-No.	Art.-No.
Internal communication		
Module supply	via system connection	
Current consumption	30 mA from system, 105 mA external (U_i)	
Inputs/Outputs		
Number of channels	4 analog IN	4 analog OUT
Galvanic isolation	yes	
Supply voltage	24 V DC (18 ... 30,2 V), acc. to EN61131-2 via spring clamp plug-in terminals, max. 2,5 mm ²	
Sensor supply	24 V DC (18 ... 30,2 V), acc. to EN61131-2 via spring clamp plug-in terminals, max. 2,5 mm ²	
Input type	differential voltage/current input	–
Voltage inputs		
Input resistance	$\geq 1 \text{ MOhm}$ acc. to EN 61131-2	–
Input range/resolution	-10 V...+10 V / 10 bit + sign	–
Conversion time	$\leq 2 \text{ ms}$ per channel	–
Current inputs		
Load	$\leq 300 \text{ Ohm}$ acc. to EN 61131-2	–
Input range/resolution	0...20 mA, 4...20 mA / 15 bit + sign	–
Conversion time	$< 2 \text{ ms}$ per channel	–
Voltage outputs		
Load resistance	–	$\geq 1000 \text{ Ohm}$ acc. to EN 61131-2
Input range/resolution	–	-10 V ... +10 V / 11 bit + sign
Conversion time	–	$\leq 1 \text{ ms}$ per channel
Current outputs		
Load	–	$\leq 600 \text{ Ohm}$ acc. to EN 61131-2
Input range/resolution	–	0...20 mA, 4...20 mA / 15 bit + sign
Conversion time	–	$\leq 1 \text{ ms}$ per channel
General data		
I/O connector	spring clamp plug-in terminals, max. 2,5 mm ²	
Dimensions	H x W x D	117 x 56 x 47 mm

CUBE20 – MODULARE I/O-STATION

Input modules

- Temperature converter
- analog I/Os

Cube20 AI4 RTD
resistance temperature detectors

Cube20 AI4 TH
thermocouple

Ordering data	Art.-No.	Art.-No.
	56230	56240
Internal communication		
Module supply	via system connection	
Current consumption	25 mA from system, 70 mA external U _I	25 mA from system, 45 mA external U _I
Analog Inputs		
Number of channels	4	
Resolution	15 bit + sign	
Inputs		
Measuring resistors	Pt100, 200, 500; Ni100, 120, 200, 500, 1000, R 0...3000 Ohm	–
Conversion time	max. 600 ms per channel	max. 300 ms per channel
Input type	3-wire; +Rx, RLx, -Rx	2-wire, integrated cold junction compensation
Thermocouple	–	K, N, E, J, R
Galvanic isolation	yes	
Supply voltage	24 V DC (18 ... 30,2 V), acc. to EN61131-2 via spring clamp plug-in terminals, max. 2,5 mm ²	
General data		
I/O connector	spring clamp plug-in terminals, max. 2,5 mm ²	
Dimensions	H x W x D	117 x 56 x 47 mm

ACCESSOIRES

Ordering data		Art.-No.
	Cube20 Common terminal block	brown/blue 56109
		blue/yellow 56110
		blue/yellow/brown/blue 56111
	System cable Cube20-MISR	1 m 56301
		2 m 56302
		3 m 56303
	Sheet with labels	40 labels per sheet 56113
	Cube20 terminal tool	 56114
	Profibus-plug	Insulation displacement technology (for rigid cables) 55585 with PG connection, Insulation displacement technology (for rigid cables) 55586 Insulation displacement technology (for flexible cables) 55587 with PG connection, Insulation displacement technology (for flexible cables) 55588
